

HPD UNIQUE IDENTIFIER: 45699454976

CLASSIFICATION: 06 83 00 Composite Paneling

PRODUCT DESCRIPTION: Arcoplast Acryloyl Engineered Polymer Panels offer the highest level of interior barrier construction for high containment and contamination control. Critical environment applications include biosafety BSL3&4; research labs; vivariums and animal care; nutraceuticals; pharmaceuticals; healthcare; and food and beverage. Acryloyl Engineered Polymer Panels are solid, non-porous, resin-rich material throughout. Its pristine surface will not support the growth of mold, fungus and mildew. Its stain- and chemical-resistance enables the panels to withstand repeated and vigorous cleaning and decontamination procedures without physical or color deterioration. Arcoplast Acryloyl Engineered Polymer Panels provide excellent mechanical and physical properties, low flame and low smoke development, and is compliant with a whole host of regulatory building and industry requirements. The panels will not delaminate, peel, fade or deteriorate over time. Arcoplast Acryloyl Engineered Polymer Panels are available in 12.5 mm, 9.5 mm, 6 mm and 19 mm thicknesses.

INVENTORY AND SCREENING NOTES:

All residuals and impurities were considered under the preparation of this HPD. This was accomplished by obtaining full formulation disclosure, including residuals and impurities, down to the 100 ppm threshold. Due to the proprietary nature of the information, the name and CAS number for certain chemicals have been redacted from this substance entry. "Undisclosed" indicates chemicals considered confidential; "Undisclosed Chemical #n" indicates chemicals suppliers protected with NDAs.

VOLATILE ORGANIC COMPOUND (VOC) CONTENT

VOC Content data is not applicable for this product category.

CERTIFICATIONS AND COMPLIANCE See Section 3 for additional listings.

VOC emissions: Inherently non-emitting source per LEED

CONSISTENCY WITH OTHER PROGRAMS

Pre-checked for LEED v4 Option 1.

Pre-checked for LEED v4.1 Option 1.

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- *a method for the assessment of exposure or risk associated with product handling or use,*
- *a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.
